

<Introduction>

Experience pruning a bonsai worth more than 1,000,000 yen!

Bonsai was introduced into Japan from China. However, over the years, it has become established as one of Japan's own traditional practices. In recent years, the artistic value is becoming more recognised all around the world. With customers coming from all over the world, Takamatsu City is famously known as Japan's number one bonsai producer. Here, you can visit the bonsai plantations, learn about the experience of planting, pruning and how to grow them.
